Party Identification

Do you usually think of yourself a Republican, a Democrat, an Independent, or what?

- ◯ Republican
- ◯ Democrat
- ◯ Independent
- ◯ Other party (please specify below)

Would you call yourself a strong ${q://QID1/ChoiceGroup/SelectedChoices} or not very strong ${q://QID1/ChoiceGroup/SelectedChoices}?

- ◯ Strong ${q://QID1/ChoiceGroup/SelectedChoices}
- ◯ Not very strong ${q://QID1/ChoiceGroup/SelectedChoices}

Do you think of yourself as closer to the Republican Party or closer to the Democratic Party?

- ◯ Closer to the Republican Party
- ◯ Closer to the Democratic Party
- ◯ Neither

Numeracy Scale: Easy

Now we would like to ask you some word problems.

If we roll a fair, six-sided die 1,000 times, on average, how many times would the die come up as an even number?

There is a 1% chance of winning a $10 prize in the Megabucks Lottery. On average, how many people would win the $10 prize if 1,000 people each bought a single ticket?

If the chance of getting a disease is 20 out of 100, this would be the same as having a ____% chance of getting the disease.

%

If there is a 10% chance of winning a concert ticket, how many people out of 1,000 would be expected to win the ticket?

In the PCH Sweepstakes, the chances of winning a car are 1 in a 1,000. What percent of PCH Sweepstakes tickets win a car?

%

Congratulations

Congratulations! You have qualified for the second part of the survey.

You will make at least another $0.40 for this second part, in addition to the $0.15 you have made for your work so for. You may also have the opportunity of earning another $0.20 to $0.30 in additional bonus payments.

Click the button below to continue.

Consent Form

You are being asked to participate in a survey that will take approximately 10 minutes.

The survey is being conducted by researchers at Stanford University. The researchers are interested

in studying how people learn.

The data that the researchers collect will be stored at a secure location. No identifying information about you will be made public. Only statistical summaries of survey responses may be presented in research journals or academic conferences.

Your participation is voluntary. There are no known risks associated with this study. Although this study will not benefit you personally, it is likely to add to our scientific knowledge.

To participate in the study, you must be at least 18 years old and be a U.S. resident.

If you have any questions about the survey, please contact Gaurav Sood at gsood@stanford.edu.

If you agree to take the survey, please click 'I agree' below.

- ◯ I agree
- ◯ I do not agree

Gun Ownership and Policy Preference

Now we would like to ask you some questions about politics.

Do you favor or oppose a federal law requiring a nationwide ban on people other than law enforcement officers carrying concealed weapons?

- ◯ Ban people other than law enforcement officers from carrying concealed weapons
- ◯ Do not ban people other than law enforcement officers from carrying concealed weapons
- ◯ Unsure

How important is the issue to you?

- Extremely Important
- Very Important
- Somewhat important
- Not too important
- Not important at all

Do you or someone else in your household own a gun?

- Yes
- No

Political Ideology

When it comes to politics, do you usually think of yourself as liberal, moderate, or conservative?

- Liberal
- Moderate
- Conservative

Do you consider yourself to be very liberal or somewhat liberal?

- Very liberal
- Somewhat liberal

Do you consider yourself to be very conservative or somewhat conservative?

- Very conservative
- Somewhat conservative

Demographic Information

Now we would like to ask you about some demographic information.

In what year were you born?

Are you ...

- Male
- Female

What is the highest level of education you have achieved?

- No high school diploma
- High school diploma or equivalent
- Some college
- Four year college graduate
- Post-graduate degree

Are you Hispanic or Latino?

- Yes
- No

What race(s) do you consider yourself to be?

- White
- Black or African-American
- American Indian or Alaska Native
- Asian
- Native Hawaiian or Pacific Islander
- Other (please specify)

CVD Task: Democrat Congenial/No Incentive

Please answer the following question.

A city government is trying to decide whether to pass a law banning private citizens from carrying concealed handguns in public. Government officials were unsure whether the law would be more likely to decrease crime by reducing the number of people carrying weapons or increase crime by making it harder for law-abiding citizens to defend themselves from violent criminals.

Researchers completed a study of two groups of cities to answer that question. The study involved comparing changes in annual crime rates for one group of cities that had banned concealed handguns with changes in annual crime rates for a second group of cities that had not banned concealed handguns.

In each group, the number of cities in which the crime rate decreased and the number of cities in which the crime rate increased are recorded in the table below. The exact number of cities in each group is not the same, but this does not prevent assessment of the results.

We would like to know whether cities that enacted a ban were more likely to have a decrease or increase in crime than cities without bans.

	Result	
	Increase in crime	Decrease in crime
Cities that did ban carrying concealed handguns in public	223	75
Cities that did not ban carrying concealed handguns in public	107	21

Once you have your answer, please proceed to the next page.

Post-Treatment Questions

Please explain how you arrived at your answer.

A few questions about the study.

On a scale of 0 to 10, where 0 is "very poorly done" and 10 is "very well done", how well do you think the study on concealed handguns was done?

	0	1	2	3	4	5	6	7	8	9	10	
Very poorly done	◯	◯	◯	◯	◯	◯	◯	◯	◯	◯	◯	Very well done

On a scale of 0 to 10, where 0 is "completely unconvincing" and 10 is "completely convincing", how convincing is this study as evidence of the effect of banning concealed handguns on crime?

	0	1	2	3	4	5	6	7	8	9	10	
Completely unconvincing	◯	◯	◯	◯	◯	◯	◯	◯	◯	◯	◯	Completely convincing

Do you think the researchers who conducted the study favored or opposed a ban on concealed

handguns prior to the study?

- ◯ Researchers favored ban
- ◯ Researchers neither favored nor opposed ban
- ◯ Researchers opposed ban

Recall Task: Democrat Congenial

How many cities were in each of the four cells in the table of results? Please fill out the table below to the best of your ability. You will earn an additional $0.05 for each cell you fill out correctly.

	Increase in crime	Decrease in crime
Cities that did ban carrying concealed handguns in public	Cell A	Cell B
Cities that did not bun carrying concealed handguns in public	Cell C	Cell D

Debriefing

Debriefing

That concludes the survey. Thank you for your time!

The results of the study we presented were purely hypothetical. No study on impact of concealed handguns on crime was actually conducted. Our aim in presenting results from a hypothetical study was to understand how people learn about results from academic studies.

If you have any questions about the survey, please contact Gaurav Sood at gsood@stanford.edu.

The next page will display your Completion Code to receive payment through Amazon Mechanical Turk.

If you have any comments about the survey, feel free to submit them to the text box below. Please click the "next" button to receive your confirmation code for MTurk.
